

Facials

Custom/Advanced Facials*

Our esthetician, Rachele Patterson, provides professional facial services using DERMed skin care products. The DERMed Skin Care Product Line developed based on 20-years of in-clinic research. DERMed products are trademarked and specifically formulated with a unique blend of natural and medically safe active ingredients. Professional-strength DERMed products are applied during client visits to the clinic. DERMed products developed for at-home use complement the client's overall skin treatment plan.

Customized Medical Facials

We thoroughly assess your skin to design a customized medical facial. Our medical facials are designed to refine, repair and rejuvenate the skin. Full extraction techniques are employed to alleviate clogged pores and to treat all skin types including acne prone skin.

Customized Chemical Peels

We provide alpha-hydroxy glycolic acid and beta-hydroxy salicylic acid peels as well as TCA (trichloroacetic acid) that help to improve and smooth the texture of the skin by removing its damaged outer layers.

Individual Extraction Sessions

Patients who need heavy extractions will be scheduled in individual sessions. These sessions are charged per hour at the rate of \$95/hr. As with all cosmetic treatments these sessions are not covered by insurance.

**All Facials Performed by
Licensed Medical Esthetician Rachele A. Patterson*

Greenville Dermatology

Cosmetic Services

"In addition to caring for your skin's medical needs, we want to provide for its cosmetic needs as well to help you look your best."

Matthew L. Miller, MD

Cosmetic Services

Greenville Dermatology provides a variety of cosmetic and spa services to help you look your best. The advantage of coming to Greenville Dermatology for these services is that a Board Certified Dermatologist will be performing or overseeing your care and will be available to you at all times to answer any questions or problems you may have.

Botox Injections

Dr. Miller has performed Botox injections for over seven years without a single adverse affect. He uses only "Botox Cosmetic" made by Allergan in the United States.

Restylane

Restylane is the new, safer collagen filler for wrinkles. Dr. Miller has performed Restylane injections since it was first FDA approved for use, and again, has not had an adverse effect or outcome.

Juvéderm®

Instantly restore your skin's volume and smooth away facial wrinkles and folds while providing a natural look and feel everyone will notice (but no one will know)!

Radiesse®

The ideal choice for total facial contouring, Radiesse® can restore a healthy, youthful appearance, enhance your existing features, help you defy age and gravity, and increase your confidence – all without invasive surgery or scarring.

Intense Pulsed Light Facial Rejuvenation*

This procedure is fantastic for splotchy pigmentation, brown spots, small broken capillaries, enhancing new collagen growth and removing fine lines and wrinkles. It can also be used on "age spots" on the arms and legs.

HR-Force Diode Laser (Laser Hair Removal)

Laser hair removal is one of the leading cosmetic procedures demanded by patients today. The HR-Force is a second generation diode laser which delivers permanent hair reduction. Using its unique patented scanning technology the HR-Force offers non-invasive and effective hair removal for all areas of the body, all skin types and most hair colors.

Intense Pulsed Light or Omnilux Light Therapy for Acne and Rosacea

Used alone or in combination with Levulan, this therapy is the hottest new trend for treating acne and rosacea seen on shows like "The Swan" and "Extreme Makeover." Safe enough for pregnant women, this is a great alternative to pills and creams for acne and rosacea. Unfortunately, this therapy is not covered by insurance companies at this time, but is competitively priced.

**All laser treatments are performed only when Dr. Matthew Miller is in the clinic*

Microdermabrasion

Formerly called the "lunchtime facial", this mild but effective therapy for minor textural abnormalities of the skin of the face has the advantage of no "down time" allowing you to go back to work immediately afterwards. A series of these treatments can diminish brown spots, and minimize fine lines and wrinkles.

Chemical Peels

We offer a variety of chemical peels from TCA (trichloroacetic acid) to the gentler glycolic acid and enzyme peels. Great for decreasing pore size, helping with acne, or diminishing fine lines, wrinkles and brown spots as well as smoothing the texture of the face.

Skin Care Products

Greenville Dermatology offers the most effective skin care products on the market including Obagi Medical Products, Latisse Eyelash stimulator, MD Forte, La Roche Posay, Glo Minerals Cosmetics and many more!

LATISSE™

Grow your own natural lashes, LONGER, FULLER, DARKER. with the first and only FDA-approved eyelash treatment.
